

17. (Amended) The display device of any one of [Claims] claims 1 to 2, wherein the display portion is composed of minute pixels disposed in any array manner and electron guns disposed to correspond to each of the pixels.

18. (Amended) The display device of any one of [Claims] claims 1 to 2, wherein the display portion is composed of minute optical reflectors disposed in an array manner.

Please add new claims 19-25, as follows:

--19. (New) The display device of claim 1, wherein the mechanical parts include a synthetic resin frame for supporting the electronic parts.

20. (New) The display device of claim 1, wherein the electronic parts include a liquid crystal panel supported on optical sheets supported on a light-conducting plate supported on a reflecting sheet.

21. (New) The display device of claim 1, wherein the nut has a smooth outer peripheral surface and a threaded inner peripheral surface, the threaded inner peripheral surface being for screwing of a screw therein.

22. (New) The display device of claim 6, wherein the accessory part is an electrical circuit part which is concerned in function of the display device.

24. (New) The display device of claim 22, wherein the electric circuit part is an inverter circuit.

25. (New) The display device of claim 7, wherein the electric circuit part is an inverter circuit.--

REMARKS

Favorable reconsideration of this application, in light of the present amendment and the following discussion, is respectfully requested.
